### A CAR FOR ALL SEASONS

Renowned for its "Outlaw" restorations of classic Porsches, Oregon-based **EMORY MOTORSPORTS** has now produced the AllRad, raising vintage cool to a whole new level. Melding a 1964 356C body with a 1990s 911 chassis, this is an all-wheel drive designed to cope with wintry conditions, despite its surprisingly light weight of just 975kg. Powered by an Emory-Rothsport Outlaw-4 engine, which the company developed to add horsepower to the 356, style matches substance: the titanium roof rack and Pirelli Ice Zero tyres on powder-coated wheels add to the frosty chic of the graphite-blue bodywork.
